Tips for Transporting your Household Hazardous Waste

Improperly packaged and transported household hazardous waste (HHW) poses a risk to you, your family, and pets.

- Keep products away from children and pets.
- Secure the load with ties to prevent the load from shifting.
- Keep products in their original containers.
- Never mix different products together.
- Make sure items are well sealed, lids tight, and not leaking.
- Place items in leak-proof tubs packed with newspaper.
- Put leaking cans into another tub or bucket, and add clay-based cat litter.
- Wrap fluorescent bulbs/tubes in newspaper to prevent breakage, or wrap the ends with plastic wrap.
- Do not bring containers larger than 5-gallon size or loads larger than 50 gallons total to the HHW Collection Facility without calling first.
- Empty containers go in your regular trash. Remove lids.

Yes

No
